On islands especially GDI will be on alert for stealths after reaching 400.
If u dont want to get caught you gotta think like them and avoid areas crawling with vigilant
mobius, patch and such looking or just by luck running into you, trying to stop sbhs in their tracks.

You can be seen even when stealthed. Sometimes if you run by someone you glimmer or if they
fire random shots you glimmer. Sometimes you just get lucky and on the background/lighting. If
you want to be fully stealthed go play ps
You want to be fully stealthed and pass people unaware go play in the snow in C&C Alpine.
