Oh yeah, forgot to to include this in my first post on this topic.

Quote:

Egyptian and Saudi Arabian intentions to begin or revive their nuclear programs in the face of Iran's continued race toward nuclear power present an "apocalyptic scenario" for Israel as well as for the rest of the world.

Egyptian President Hosni Mubarak announced a decision to restart his country's nuclear program. On Wednesday, Iranian President Mahmoud Ahmadinejad announced that his country had begun operating 3,000 centrifuges for the enrichment of uranium.

Lieberman also said Pakistan was a major threat to Israel due to the political instability there and the fact that the country had "missiles, nuclear weapons and a proven capability."

This is all Israeli propaganda to justify an unprovoked attack on Iran.
