If you're in grade 6, that means you're only 10 right now, and you'll be turning 11 next year (if I'm not mistaken). You shouldn't even be playing Renegade.

Nor should you be on the internet for that matter, with all the mature content it has to offer. Have you even hit puberty?

I'M 12 and i should be in 7th grade by now but it is diffrent here in us then it is in russia so that is y i'm in 6th grade right now

6th or 7th grade, doesn't change the fact that you are an immature ass. Though I would be willing to give you another chance.
