Squids are so fucking awesome, you can dominate any ship with them.

For the Soviets, anyway.

Squids were just amazing units just as the dolphins. But Squids were more "awesome" in their attacks.

But it was the Apocalypse tanks that kept me going. I always buy 5 Apocs and group them together...just five tanks and harass. In like 20 minutes or so, all of them are elite pwnage tanks. Then the fun begins!

What a great game!
