Just something you should worry about, but otherwise it's good.

Get_Player_Name
Get_Player_Name_By_ID
Get_Wide_Player_Name
Get_Wide_Player_Name_By_ID
WideCharToChar
CharToWideChar

need to be (delete [])-ed

```
const char *pName = Get_Player_Name_By_ID(10);
if(pName)
{
  //use
  delete []pName;
}
```
