AircraftkillerGood, then live in your happy little wonderland... Cheats don't exist to you, and hopefully they never will if we have it our way.

Thats right, these cheats don't exist. And until you show me or anyone else proof otherwise, then only the extremely gullable will follow as blindly as you have them going.

I'm not trying to go against you on this, but I'm not going to succumb to what you say, especially when you deny the public any evidence to support your claims. I could very easily say that I have a "Hyper Aim/Wall/Lag/Speed/blarg hack" and say that for the good of the community I'll keep it secret. But you'd have to believe that it exists; I did claim I had it.
