EpyonKIRBY098MSGTPAIN commands far more respect than any of you could hope to gain through showing your ineptitude here on these forums with comments like "STFU DUDE", and the ever so classic "YOU BETTER WATCH IT OR HE'LL GET YOU."

I thought people earned respect, and not commanded it?

Msgtpain has earned the right to command respect... it's a saying. He's done more for the community than most... and NOT by changing names of servers.
