Kgboutlawusually theres these little things called proxy mines in the obelisk back of HON back of pp and back of ref. So ur not going to run into the obelisk

You are assuming of course that they have mined these places AND the ramp, which is usually not the case. Also, you can ride the edge of the building and drive past the HON to make it to the airstrip OR obselik OR the front of HON. You can't mine everywhere, cuz you only got 30 mines!
