We have a crates plugin we were working on but got to to the side and never worked on again

EMP (disables and ejects players from all vehicles in xxx meters for xx time)

TeamMoney (like the normal money but the whole team gets it)

DisarmC4 (disarms all the players mines that picked the crate up)

BlownFuse (powers down base defences)

I'll upload the source later, maybe someone else can carry on were we ended
