Viking wrote on Thu, 13 December 2007 23:37I have a picture of my tank on it's side.

It was like that for 2 minutes before some nice guy in a APC came and pushed me back onto my tracks!

i believe they only blow up past certain rotation.. which yours is not fully on its side but on a hill so its still at an angle

if it was on a flat level surface you would have blown up
