Also it's because no one know's we're the original, so they play at other copy-cat servers like wittebolx's.

so because they dont know Kam is the "Original" they play at my servers??

and why is it that when kams servers are the "talk of the day" my name always has to be mentioned?

me and clown had our discussion a while back, and we are all good. stop bitching (again) about the things i do.

I can list about a dozen people who are disgusted at your stealing. It was just absolutely stubborn how you just went about asking about Kam's server, and then stole it and took it as your own as if you thought of the idea.

Can't you honestly think of something original for once? I go to your forums and all I see is stuff taken from Kamuix's server.
