I can't tell if you're being serious, I'm buying a 1GB dual stick set soon, so 1.5GB o' ram! yeay!

So then you can have 1.5 too!

I might just buy a new mobo that supports AM2 or something higher, DDR2 and SATA-II and on-board audio.

You should just save your money and buy a new PC.

a pre-made made pc? nah.

buying a new mobo + processor + graphics card and HDD would be a lot cheaper.
