readme.txt~~~~~~~~~~~~~~~~~ Neo Gods MP3 Script ~~~~~~~~~~~~~~~~~~~
Modified by: MathK1LL Neo Gods Primary Coder

Credits
   * ExEric3 (www.ww-gaming.net) - I forget what he helped with
 but Eric was mentioned in the original draft of this
 readme so I'm keeping him on the list of creditors.
   * aca20031 (www.st0rm.net) - Scripting Tutor for the most part
 > Must admit that the output follows an old copy of aca's
   regulator "St0rmServ"
   * bali/nudalz (Fastc0nn Bot Coder) - Primary Scripting Tutor

   * And, anyone else I forgot to mention

<rant>Remember kiddies: Give credit where credit is due. I can't tell you
 how many times people have told me to give them credit or
 asked me to remove something because I 'stole' their work.

 This has probably made me become a cynic-like person in the
 sense that I give LOADS of credit to people who help me out,
 though nowadays people don't care if I ask for their help
 and I say "I'm putting a credit/special thanks comment to thank
 you for your help." </rant>
 ~~~~~~

  In this file, there are three versions; One for CS, one for NR,
and one for BR.

> Installation: (CS)
 - Copy CSmp3.mrc into your CloudyServ directory.
 - Start up CS and type /load -rs CSmp3.mrc
 - Once loaded, Restart CS
 - The MP3 Script will auto-start. If the server isn't up,
   It will still execute. It just won't actually play them.
 - Command !mp3 doesn't work yet.

> Installation: (NR)
 - This one is tricky. You can either have a second mIRC
   to use as a bot OR you can just use your own mIRC.
 - Copy settings.ini into the mIRC dir
 - No matter what you choose, copy NRmp3.mrc to the mIRC
   directory of your choice.

- Type /load -rs NRmp3.mrc and Restart mIRC. Same for CS, the
  script will auto-execute.
- Again, you can type !mp3 ingame and see the current MP3 file
  playing at that time.

> Installation: (BR)
- If you have a BR relay bot, just copy BRmp3.mrc to the relay
  bot's mIRC directory.
- Copy settings.ini into the mIRC dir
- Startup the relay bot and type /load -rs BRmp3.mrc
- Restart mIRC
- Again, you can type !mp3 ingame and see the current MP3 file
  playing at that time.

Author Notes and Comments:

   Well, this script and Readme were created about a year or two ago and I just
recently found it on my mom's laptop from which I was gaming about a year or two ago.
In this time, I'm sure that most of your able-body scripters have created a similar script
for your Renegade servers. But, I am releasing this script seeing as I've found it just recently
and wanted to release it but I don't know if I already released it before or not. If so,
that's ok; Here it is again and I hope you enjoy this. Feel free to alter it, add more songs,
et cetera. Oh, also, I realize the NightRegulator version is outdated seeing Nightma added a
Jukebox
in some time ago.

I've also included an image with all (or most) of the MP3's inside of Always.dat.

Thanks,
Zack "MathK1LL" L.

P.S.

Also note that I was still a newb at scripting when I scripted these scripts. I could probably
redo these but am too lazy because I've got bigger and better projects on my plate at this time
including Graduation and going off to college along with NeoServ (private regulator right now).
