To bad your a nobody so stop trying to act special.Go make your little maps and be a good little boy.Eventually youll realize that you have no authority what so ever.Till then enjoy your little fanatsy.

Hell your barely even wanted here.And Im willing to bet that over 50% of the commuinty would rather have you gone than have your maps.With you gone it would open up so many possibilities for other mappers.All those ones who are more talented than you but dont feel like putting up with your flaming.
