Okay, I've been wondering this for awhile.....

Its sort of two questions, but equally related.

1: Is the chem sprayer just a more highly powered version of the flame thrower, or are the two better for different things?

2: Is there a difference between 'Burn' and 'Tiberium' damage. As in, the effect AFTER you've been hit by one of them, and it continues to hurt you. Is tiberium more? Or do they both have advantages?

Thanks.
