Tiberium will invade earth soon. Then GDI will get game-cam ready to record Havoc killing nod, send it back through a time machine to Westwood and tell them to make a game out of it. Also note that we are one of the 20 or so civilian models in renegade. Any other model is 3rd-party and then an outcast. "Happy polygon tessellation to you my son, it makes your look a little less L.O.D.ed"
