ok so i've installed this game so many times on vista. and they say it runs smooth on vista. so every time i load it up, it works, but when i restart and than go back in, i get errors like wont load it doesnt say anything but just completly doesnt load. and when i install "shortcut to desktop" it doesnt come on with 1 on the desktop.... \*weird\* and the other thing everytime i load online it keeps on kicking me off and saying my account is being used in another location. pleas somebody help me out.

thank you.
