I love how people act like the US is some huge, ominous force which is so evil and hateful. Some of you should try going to Africa sometime. Lets see if you still want to live there after about, a week.

I've been all over the world. Singapore, the Galapagos, Africa, Indonesia, Japan, Canada, Mexico, England, and France. None of them were even a shadow next to America.

(Of course, the Galapagos isn't a country...Just thought I'd throw that in there for fun.)
