Quote:after that execute the file to enter the installation.
tick all boxes, except for scripts 2.9.2.
we already have ssaow 1.5 so.. no need to install those old scripts.

Those two cannot both be ticked at the same time, if you ticked 2.9.2 it would untick ssaow 1.5.
The idea was to offer an alternative scripts version for servers who don't want ssaow.
