Commando Burton wrote on Sat, 12 January 2008 21:53 This is what serial number I did
06692529081891341*****

Since WOL switched to XWIS there is no need
for unique serials anymore.

Replace ***** with any number you like to get the FDS working on xwis. From game-maps.net

No, it's 0669 followed by any 22 number combination. But that's only for getting through the
installation. You're supposed to go in and change it to your real serial after installing.
