luv2pb wrote on Sun, 13 January 2008 17:35 It pains me to say it, as until this PC I had used ATI in every PC I ever owned, but nVidia is the way to go. You just get more bang for your buck. XFX makes a series of 8800's that have a great price and unmatched warranty.

Also, I don't think ATI used DDR3 yet. One of many reasons their cards just can't compete any more.

"nVidia is the way to go" That comes down to personal preference, I like ATi more than nVidia, alas, I'm sticking to ATi.

My pc wouldn't support DDR2, let alone DDR3 so there is no point in me wasting £100+ on a 8800.

Oh, and ATi do use GDDR3.
