5 to 6 KB is normal for dial-up. Remember that internet connections are measure in Kb (kilobits), not KB (kilobytes), so 6KB=48Kb (there are 8 bits in a byte), which is about right. You'll never (or rarely) see the full 56Kb on dial-up.

BW is bandwidth It's an exploit becuase lowering it makes your character lag on others' screens.
