ok so how can I get LevelEdit to load things faster takes like 2 mins to make objects and on my old pc it took 2 secs

This pc has
2 GB Ram
Radeon x1800gto
AMD 64 X2 2.37GHz at stock 3.00 when over clocked

Old Pc
254 Ram
No video card , just chipset
Pentium 4 2.40GHz

Os it something with the raid settings ?
