• Windows XP SP2 or Windows Vista
• 2.0+ GHZ Single Core Processor
• 512 Mbytes of System RAM
• NVIDIA 6200+ or ATI Radeon 9600+ Video Card
• 8 GB of Free Hard Drive Space

Recommended System Requirements
• 2.4+ GHZ Dual Core Processor
• 1 GBytes of System RAM
• NVIDIA 7800GTX+ or ATI x1300+ Video Card
• 8 GB of Free Hard Drive Space

Where did you get that? Why would they put both a top range 7-series card and a budget card they stick in cheap laptops in the "Recommended System Requirements?" I'll be expecting an AMD/ATI splash screen in this game.

If thats the Crysis min specs, My graphics card can handle Crysis on low (ATi Radeon X550 Sapphire, 256MB, 400 core, 300mem), and my CPU does a good job handling it (AMD 64 3200+ 2.0Ghz).

Splash screen what?
