I know all the .dds files for the ion. But even if you edit them all to the color you want, the bottom part (explosion part) still remains blue, you can change that color in W3D viewer. It are called Emitters.

In my sS you can see all the filenames (dds and w3d)  
the red/green/blue symbols stand for w3d, the others are dds, and can be edited in photoshop.. If you need help with W3dviewer then i could help you out.
