Dealman wrote on Sat, 26 January 2008 05:07 You change color of W3D emitters in the W3D Viewer.

1. Open the needed .W3D emitter.
2. Change to desired color.
3. Export the .W3D with same name.
4. Put the .W3D Emitter in the /Data folder.

Not tested, but it should work.

dont forget set w3d name

by the way, here my ion (il trying to crate some cnc3 style laterZ...)
