Hello!

You all may or maynot remember me back in November 2007 complaining about my laptop crash:

Starbuzz wrote on Fri, 16 November 2007 12:41I always thought, personally, that playing shooter games in a console is weird but my laptop (only comp with internet) fell yesterday and the hard drive guts broke loose. I am at work now lol.

So, now I am left only with my long-asleep PS2 for gaming entertainment.

Anyway, I have not played Renegade from then till now! Sin! Well, I am back with another comp. I got my new siggy, new pilot avatar...Starbuzz the Elite Orca pilot and super Havoc is back to kick some a**!

I will be be playing regularly 2 hours a day from today (January 29) onwards.

I know nobody cares.
