The smartest move M\$ made latly is is buying a company in Virtualization tech. (To most likely compete) with the high end VMWARE ESX solution.

I don't see Yahoo as a real strategic move, as MSN is alot more popular, though ofcourse this will help the M\$ imperium.

With the Server 2008 infront of the door and VT already integrated.
I think M\$ will keep groing and groing

Sooner or later Time will tell.
