He owns DPDN, LOL. You're extremely dense.

Yeah, DCom Productions. Yeah whoo. Good for him
Sure to note that down

And what does, Quote:You're extremely dense.[/ mean exactly?

Honestly. Do you think it's worth me messing about with this LUA? Im dead interested in it and really enjoy the whole, make your own commands and functions sort of thing with it but, all it ever does is bang on about "I cant open this file, PERMISSION DENIED". Then theres the "Error finder" that is meant to be a grand adon to the programme. Ok, RoShamBo. Sorry, but its shit. Okay. It says i need an end to close a function properly. So i add an end where it should be. Then it comes up with a new error saying it needs an end at the very start of the function the "functionOnChat(pID,Type,Message)" part.

That's a total "WTF,OMFG moment "

And,

Little P.S for Mr.Dave Anderson. Hard to actually find what i wanna download from your site .

Bored to death of LUA p**ing me of all the time i thought i'd download and have a little peak at what this evil C++ is all about, just to see whats what .

All i could find was a load of Microsoft shit!

Is there some secret version of C++ that is more suited to game modding?...Or is it all in this wierd C++ Microsoft crap download thing I find everywhere all the time?

LOL, after installing it i cant even find an .exe to launch it...

Do I have to "hack" in or something? LOL->
