They have already confirmed via satellite that it was NOT SHIP ANCHORS that cut the cables...so what the hell was it then? Sea weasels? Something is happening.

I don't know what it was, and I'm okay with not knowing, because I don't expect myself to know everything.

But somehow, I can't accept the whole "It's a conspiracy! The government did it!" option. That kind of thinking is akin to the ancient Greeks thinking Zues causes Lightning. "We can't think up a way this would happen, so we'll blame it on a higher power/authority/something we don't understand!" Calling it a government conspiracy is one thing, but 4 of these lines cut within such a short period of time?

"There are no coincidences, only the illusion of coincidence."

@R315r4z0r: No... that's not even close.

It COULD not be a coincidence. It COULD be a government conspiracy. Zues COULD really be in charge of making lightning. It's possible, right?

But probably not.
