If it was not ships than how was it an accident? When was the last time these cables were severed...never? Now FOUR of them within 2 days, miles and miles apart. Come on man wake up. Someone cut the damn cables. Why? If it's a prelude to war, we won't know until it's already underway. If its for the purpose of spying (installing taps), we will never know (and the media will not report on it, just as they are doing now).
