JPNOD wrote on Wed, 06 February 2008 14:11 You don't want to run a stable server with Windows without having to update every month. Let alone Windows ME. now that's a waste of time right there.

If you want a server that bad surley you can host a server at home but then make sure its based on Win NT or Linux. And don't want to exceed 16 players.

They have a 56k connection, there's no point in even trying.
