So basically, I think Dungeon Siege is one of the greatest RPGs made in a while. My only problem with it is this:

This happens to me every time I try to walk away from the Goblin caves, or, if I make a multiplayer game and start at the Bonepicker's Place and backtrack to the Goblin caves. It also happens in the Multiplayer campaign when trying to enter the 4th town, or the hidden Eastern Island.

The problem seems basic enough. There's a file that needs replacing, and I should re-install to fix it. The only problem is that I misplaced my CD a while back ago, so I re-install. I've looked online for the file with no sucess. Can any Dungeon Siege player upload theirs? This is my last hope, since I really don't feel like shelling out money to buy a game I already own.

Fatal Error

A fatal error has occurred and the app must shut down.

Decoding error! Compressed data is either corrupt or unreadable, possibly due to hardware failure. Try repairing the resource file (reinstall?) to fix this problem.

File on disk: 'D:\Dungeon Siege\resources\Terrain.dsres'

Internal info:

```
resource = art\bitmaps\terrain\seashore_1\b_t_sea01_seashore.raw
offset = 0x07912460
size = 349540
crc = 0x35D49C34
last error = 0x00000017
```

OK
