Can you install Resurrection from <http://www.icefinch.net>, start the game and then send the me crash dump it created in 'debug' directory (compressed to [yrr@icefinch.net](mailto:yrr@icefinch.net))?

If it is the common Vista crash, I'll send you a special Resurrection version, which creates a much bigger crash dump (around 100 MiB and more). That would help me finding the cause of the bug.
