however i think u have a too high cpu usage as this happens on the same spots.

if so
then i was right in the 1st post in the first place.

My CPU usage is fine, kthx. The only part that's outdated on my system is the video card, and I get a smooth 30-40 FPS while playing, so clearly I'm okay on the hardware department.

I have a corrupt file. It's that simple. Does anyone have a replacement?
