Zion Fox wrote on Tue, 19 February 2008 01:00If you're going with nvidia cards, go for intel processors.

If you're going with AMD processors, go for ATI cards.

General rule of thumb.

There are better intel processors out there which are reasonably cheap.

Im perfectly happy with my AMD 6000+ and my nVidia 7900GS OC, and yes the normal AMD 6000+ doesn't overclock well at all. You can maybe push it to 3.2Ghz with stock cooling and then maybe 3.4Ghz with liquid cooling. Don't get this CPU if you plan to get impressive overlocking speeds. However it is still a great CPU I haven't had any problems with mine.
