Well i have 1 server running and i want a second one but BRenBot doesn't support slave so i had to use 2 FDS's and 2 BRenBot's.

My problem is that i get an mis-communication between those programs:

Brenbot A works with FDS A+B

Brenbot B doesn't work with FDS A or B OR he works with FDS A+B (every second other combi)

How to solf this???

Pls help
