yea i now but is saw 2 slaves as the easiest way first

I said FDS A and FDS B which are both master servers and both have there own BrenBot.

I installed FDS A in X:\Westwood\RenegadeFDS\Server\ (brenbot included)

I installed FDS B in X:\Westwood\RenegadeFDS\Server2\ (brenbot included)

I had given them both there own serial code to avoid any serial errors on WOL but i got this local error between those FDS's and BRenBot's.

Oh, i turned Remote Admin to 127.0.0.1:4949 is this the problem?

PS. BRenBot Rules, DanPaul
