{SB}Lone0001 wrote on Thu, 21 February 2008 03:18does it not have some sort of IP command, in the release notes it says it does.

Quote:ip=xxx.xxx.xxx.xxx Specifies the IP address to bind to for multi-homed systems.

That looks like either a command line (\\server.exe -ip xxx.xxx.xxx.xxx) or it's in an options file...

Edit - that's a command line option, says so in the Readme.
