The (TM) has been removed but no change at all. http://www.renhelp.net/index.php?load=7
I have followed the guide from this link but even that hasn't worked, the install path was correct to begin with and i still have all the presets missing :S

UPDATE
ok, i have worked out what was wrong

C:\Program Files\EA Games\Command & Conquer The First Decade\Command & Conquer Renegade(tm)\Renegade

The registry that was put in was missing a "\" at the end of the link, my error i believe. Thank you all for your time but hopefully i will be posting less now that i have the presets ^^ thx again
