what a shame

I like the games with 40-50 people in them

na sat wasn't to good

lag normally wasn't a problem though

probably 70-80% of the time it would run smoothly with intermitent pauses

the rest of the time lag would be a real killer

but there was allways a bit of lag though

got used to it would try to never be in a 1 on 1 shoot out

my conection would max out at about 12-130K

I expect land line highspeed to be coming availible early this summer

came avlible all around me last summer and im hoping they will close there gaps this year

guess ill mostly just play Ra2 till then
