---

As the title says, my Command and Conquer Renegade (on C&C first decade) won't do anything when I try to open it whilst running my FDS at the same time. It produces a loading cursor when I click on Renegade and then stops loading about 2 seconds after clicking on it.

Can anyone help me with this i.e. Any suggestions/FACTS?

Here's a print screen of Brenbot and Renegade Master Server up and running at the same time if it helps you:
