You're too stupid to use it anyways.

lol i got it work... wanna join my test server? do you like it to build real AGT, Obelisk etc with explosion anim? wanna use airstrikes that kicks your ass? wanna spawn maps?

Dude, get a clue. Anyone can freakin do that. If you actually want to impress us, do something original.

k then open a serv and make a real agt and obelisk

Is it even worth the effort?

Besides, because you can use LE, and make a few scripts, it doesn't make you some kind of god.

Also, my LE is broken at the moment. Get C++ and post the Script here.

Like I said, it isn't worth the effort. Hell, I could just use google to find it easily.
