IceSentryI have this problem *only* with glacier flying. My FPS goes down to about 2. And it is completely unplayable. I'm not exaggerating, I have to sit out the whole game until it passes, sometimes it doesn't even pass. I sit there while my computer is lagging, "not connection/internet lag", "performance/computer lagg".

Don't feel alone, see my specs below. I have the exact same problem and it only happens on Glacier.

Really sucks, because I like the map...

My computer specs

Windows XP Professional

P4 2.0Ghz
