Luck to get the box first? I hadn't even thought about that. You should be able to kill him before he gets it. Destroying his harv or keeping yours? You should be able to kill his AND prevent yours from dying if you know what your doing and have skill.

Getting your tank first means that you had the ability and skill to get your money faster then your opponet. Many choices have to be made, and to make them it requires knowledge, then to complete your task, it requires SKILL.
