No, you don't click "new account" button, they don't work since WOL was taken over by XWIS.

Just type in your username and password of desire (username can be anywhere between 3 and 9 characters and must start with a letter, password has to be 8 characters, no more no less) and click "Login".

If it succseeds, you will be given the MOTD (Message Of The Day), if not, you will be given a reason.
