---

When i try to update my Ranks with the PHP scripts i get this error:

Incorrect integer value: " for column 'nodharv' at row 1

It doesn't give the error after a fresh install of the plugin. Only when a game has been played after install.

Anyone who has an idea??

Besides that i got 2 questions:

In witch plugin is the !FDS command integrated???

and

Is there a plugin to give a message ingame if someone joins on IRC?
