Sn1per XLits not just this map it happends to otheres also
then dude, you need to go over my tutorial one step at a time, vary nothing, do exactly as it says.
when it says minimize the screen, minimize the screen. etc... and see if you're leaving something
out. but be certain it's exactly as the tutorial says.
with you saying it's with other maps too. sounds to me like you're just doing it wrong.
