I followed your tutorial and when I look in C:\Program Files\RenegadePublicTools\LevelEdit\your\_map There is no folder called scripts.

From your tut:

Quote:Now go to your C:\Program Files\RenegadePublicTools\LevelEdit\your\_maps (Default install path) and delete the following folders. "ALWAYS", "Characters", "Presets", so that all you have in it is your "EditorCache", "Scripts", "Levels".
