steve8274 wrote on Tue, 06 May 2008 14:43 Well I added laser fence things in hourglass, then I put the .idd file into the FDS Data folder. It loaded up fine. The harvester was just trying to drive through the airstrip. The GDI harvester didn't even spawn. The doors didn't open (are you sure it isn't the .idd file that screws doors up?) and my changes I made weren't there.
place both inside the map delete old ones and test it
